Career Objective

A dedicated front-end developer, I create dynamic and user-friendly web experiences. I translate design concepts into responsive interfaces while prioritizing clean code and accessibility. I thrive in collaborative environments and continuously adapt to new technologies, aiming to contribute to innovative projects that balance aesthetics with usability

Work Experience

Freelance Front-End Developer (FEB 2024 – Present)

Self-Employed | Remote

- Designed and developed responsive websites and applications for a diverse range of clients using **HTML**, **CSS**, **JavaScript**, and frameworks like **React.js** and **React-BootStrap**. • Collaborated with clients to gather requirements, define project scope, and deliver customized solutions aligned with their branding and business goals.
- Optimized web performance, achieving up to a 30% improvement in page load speeds through code refactoring and image optimization techniques.
- Ensured cross-browser and cross-device compatibility, delivering seamless user experiences across platforms.
- Integrated REST APIs and third-party tools for dynamic functionality, such as booking systems and interactive forms.
- Delivered high-quality results within tight deadlines, with 95% of projects completed on time and receiving positive client feedback.
- Managed projects end-to-end, including requirements gathering, wireframing, prototyping, development, testing, and post-launch support.

Key Achievements:

- Built a padel court reservation website with user-friendly booking features, enhancing client bookings by 40%.
- Designed a portfolio site for a creative agency that increased their inbound client inquiries by 25%.
- Successfully managed multiple projects simultaneously, maintaining a strong focus on communication and client satisfaction.
